

# Adding the Rainbow Brain to an Existing LOR Network

1. Showtime S2 software running on a computer. (MP3 Director can also be used)
2. Speaker used for sound effects
3. USB-485 adapter connected to computer
4. Light-O-Rama components including any and all controllers
5. Lighting plugged into controllers
6. iDMX plugged into LOR side of network. (in order for the Rainbow Brain to be connected to the iDMX, you need an XLR to RJ45 adapter)
7. Standard Cat-5 cable connects from adapter to Rainbow Brain (XLR connections can still go to DMX lighting devices).
8. 5 output ports from the Rainbow Brain then connect to any of the Rainbow Lighting devices.
